WHEN TO TRAVEL

A year on the plains

East Africa is rewarding all year. The herds move with the rains, so the best place to be changes with the month. We'll match your dates to the right parks.

Jan	Feb	Mar	Apr	May	Jun
CALVING	CALVING	GREEN	GREEN	GREEN	DRY

Jul	Aug	Sep	Oct	Nov	Dec
CROSSINGS	CROSSINGS	CROSSINGS	CROSSINGS	SHORT RAINS	FESTIVE

January – February · Calving

Thousands of wildebeest are born on the short-grass plains of the southern Serengeti, drawing predators close.

March – May · Green season

Lush landscapes, dramatic skies, fewer vehicles and better rates. A favourite for photographers.

June · Dry season begins

The herds move through the western corridor and Grumeti as the land dries.

July – October · River crossings

The Mara River crossings in the northern Serengeti, plus excellent game viewing everywhere.

November · Short rains

Quiet parks and herds heading south. A good time for Kilimanjaro and Zanzibar too.

December · Festive

The herds return to the southern plains. Celebrate the holidays under African skies.
